

STATEMENT OF INFORMED CONSENT

Thank you for your participation in this research study.

Purpose of the Research:

This research aims to enhance software engineers' behavior and motivation towards data quality in data-driven requirements engineering by investigating different motivational techniques. Your participation will help us to evaluate and improve our proposed designs and to measure their effect. We hope that our research will have a positive impact on data quality and eventually on the software systems being developed based on these data.

Risks and Confidentiality:

This research poses no risks to you other than those normally encountered in daily life. No personal information will be collected and other information from your session will be kept confidential. Your data will have a number associated with it. After the research is completed, we may save the notes for future use by ourselves or others, but your name will not be included.

Your participation in this research is voluntary, and you are free to refuse to participate or leave the session at any time. Whether or not you choose to participate will have no bearing in relation to your standing in your university or organization.

Questions About the Research?

If you have questions about the research, you may contact:

Email: _____ Phone: _____

You may keep a copy of this form for reference.

The details of this study were explained to me by:

Researcher Name:

Date:

I have read the above project description. I agree with the terms and hereby consent to participate in the study.
